Power BI projekt (klasika)

Power BI projekt redko vključuje le prikaz enega KPI-ja. Pravzaprav je celotno okolje postavljeno tako, da kar kliče po analizi mnogoterih popolnoma ločenih podatkovnih virov, ki jih potem pregledujemo po istih dimenzijah. Tukaj pa večkrat pridemo do poročil na več kot dvajsetih zavihkih in pa predvsem številu mer, ki včasih poseže celo v trimestne številke.

Power BI projekt– poenostavitve

- Poskusimo ohraniti preprosto Star schemo
- Imamo stolpec scenarij za AC, PL, FC ipd...
- Imamo stolpec KPI za Net Sales, Gross Sales, RVS ipd...
- Disconnected slicer za Monthly | YTD izbiro
- Na kronološke dimenzije dodamo Current Month, Current Year ipd..
